

IN THE CLAIMS:

Replace Claim 1 with the following amended Claim 1:

1. (Twice Amended) A multicolor display apparatus, comprising:
an array of semiconductor nanocrystals arranged to form a plurality of pixels of different colors, wherein the sizes of the nanocrystals determine the colors;
a pixel addressing system operatively associated with the nanocrystal array for selectively optically exciting the nanocrystals to produce a luminescent color pattern of pixels.

REMARKS

Claims 1-23 were presented for examination. Claim 1 and the specification have been amended to delete the term "undoped." Reconsideration is respectfully requested.

This amendment was not earlier presented since the PTO only raised the issue of new matter as to "undoped" in the Advisory Action. The term "undoped" was added to Claim 1 in response to the first office action. In the final office action, the PTO did not reject Claim 1 under 35 USC 112, first paragraph, as should have been done if the term was considered to be new matter. Instead, the specification was objected to as failing to provide proper antecedent basis for the claimed subject matter under 37 CFR 1.75(d)(1). Therefore Applicant amended the spec to add the term "undoped" since the PTO appeared to be directing Applicant to do so.

Therefore Applicant requests that this amendment be entered, if not for purposes of allowance, at least for purposes of appeal since it would reduce the issues n appeal.
